SUMMARY

Senior Software Engineer with 4+ years of experience building scalable, accessible and high-performance web applications with React, TypeScript, Next.js and Node.js, backed by AWS. Experienced in frontend architecture, reusable component development, framework migrations, automated testing, web accessibility, SEO and performance optimisation. Strong background in CI/CD, production monitoring and technical documentation, with a track record of modernising existing systems and delivering reliable, production-ready software alongside engineers, designers and product teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, Python, Go, C#
Frontend: React, Next.js, Svelte, React Native, Tailwind CSS, Vite, Shadcn, MUI, Redux, Zustand, TanStack Query
Testing & Quality: Jest, Vitest, Playwright; unit, integration and E2E testing; Web Accessibility (WCAG); SEO; Core Web Vitals; Lighthouse
Backend: Node.js, Express.js, Python, REST APIs
Cloud & DevOps: AWS (Lambda, DynamoDB, S3, CDK), Azure, CI/CD pipelines, Git, production monitoring
Databases: PostgreSQL, MySQL, DynamoDB, MongoDB, Firebase
AI: Retrieval-Augmented Generation (RAG), LLM integration

PROFESSIONAL EXPERIENCE

Rhino Partners (Remote) — **Apr 2025 - Present**

Senior Software Engineer — Sep 2026 - Present

- Developed full-stack features for an AI-powered clinical search application built with Python and Retrieval-Augmented Generation (RAG), enabling GPs to retrieve clinical information through LLM-generated, source-grounded answers.
- Migrated an existing Svelte application to Next.js, modernising the architecture and aligning it with the wider React-based platform.
- Built and maintained internal observability applications with third-party and internal integrations to centralise monitoring and operational insight.

Software Engineer — Apr 2025 - Sep 2026

- Co-architected a greenfield financial data platform for investors using React, Next.js, TypeScript and AWS, designed to support thousands of concurrent users with high availability.
- Built high-performance visualisations and interactive tables rendering millions of rows of financial data without blocking the UI.
- Optimised state management and data fetching with Zustand and TanStack Query, cutting perceived load times by an estimated 40–50% and eliminating redundant API calls.

Software Engineer (Fixed-term Contract) | Villvay Systems (Pvt) Ltd — **Jan 2025 - Apr 2025**

- Joined mid-project to rescue a delayed e-commerce launch; refactored a fragmented Next.js/React codebase, resolving technical debt and delivering a stable, launch-ready frontend on an aggressive deadline.

Software Engineer | Aeronology — **Mar 2023 - Jan 2025**

- Core contributor on the full rewrite of AeroControl from Vue.js to React; implemented React Query caching within a BFF architecture, cutting baseline load times by an estimated 35%.
- Drove the application-wide API migration from GraphQL to REST, eliminating payload bottlenecks and stabilising end-to-end data handling.

Software Engineer (Intern) | Aeronology — **Sep 2022 - Mar 2023**

- Delivered full-stack features using AWS Lambda, DynamoDB and S3 within a React, Node.js and .NET ecosystem.

ENGINEERING PRACTICES & COLLABORATION

- **Testing:** At Rhino Partners and Aeronology, wrote unit and integration tests with Jest and Vitest, and end-to-end tests with Playwright, to catch regressions before release.
- **Accessibility:** At Rhino Partners and Aeronology, built accessible React interfaces using semantic HTML, keyboard navigation and ARIA, following WCAG guidelines.
- **CI/CD & monitoring:** Configured CI/CD pipelines to automate builds, tests and deployments; monitored and debugged production applications using logs and monitoring tools.
- **SEO & performance:** Improved SEO and Core Web Vitals, using Lighthouse to measure and verify gains.
- **Documentation & collaboration:** Regularly wrote and maintained technical documentation; reviewed pull requests and worked closely with designers and product stakeholders.

EDUCATION

BSc (Hons) in Management and Information Technology | University of Kelaniya, Sri Lanka — **Mar 2020 - Mar 2024**
Specialising in Information Technology | First Class Honours (GPA: 3.71)
